

Personal Statement Seattle University Sample

It is not always an easy task for a young lady to prove her worthiness of being a student in a solid institution like Seattle University. I understand that there are so many individuals, who want to achieve the same purpose and become students. It is wrong to state that I am better than all the other applicants; still, it is possible to explain why this place is crucial for my future. The teachers from my college life have already shown how it is possible for me to become a better person and which career goals should be set. Therefore, now, I am able to identify my future goals and the ways how they can be achieved. I see my future in the sphere of finance. Business is the world that attracts my attention a lot. I cannot imagine my life without numerous financial affairs, and I want to prove that I am worth attention and recognition.

My experience provides me with a chance to believe that I could become a good specialist. Being a student in the Zhujiang College of South China Agricultural University and Seattle Central Community College, I realized that people are free to choose their own paths and develop their skills accordingly. Each problem is not an obstacle but a challenge that has to be overcome with the help of the best human qualities and abilities. There is no necessity to avoid difficulties. Sometimes, it is even impossible. What I have to do is to be ready to use the best of myself and help other people to do the same.

As an international student, I perfectly understand, speak, and write English as well as Chinese. This bilingual ability makes me sociable at different levels. This is a real treasure for me to continue developing my cultural and intellectual backgrounds in Seattle University. It is also a good chance to

explain other students the peculiarities of my native country and help them better understand the world of Chinese culture and traditions. Seattle University is the place of education for many international students. It opens its doors to people from different parts of the world and explains how it is necessary to respect each other. This quality is important for future leaders, and I want to be one of them. The business industry is constantly improving by properly prepared specialists. It is not enough to have a good financial education. It is more important to develop the proper qualities, communicative skills, respect, and understanding. At the same time, good leaders should be able to listen and make conclusions. The reputation of Seattle University shows that I can get the required portion of support here. It combines the ideas of faith and education. It helps to develop the good traits of an individual and takes care of the potential for academic success.

I am lucky to learn two different worlds, China and the USA. Now I know that it is possible to unite people and pay attention to their cultural, racial, and social backgrounds. Someone may think that all these points have nothing in common with the world of business and finance. I do not agree with such statement. It does not matter whether people work in the sphere of finance, medicine, or education; they should take care of each other, respect each other's culture and interests, and know how to help each other in a proper way. Of course, some kind of rivalry is crucial for any development. But all these competitions should focus on the development of personal strengths, not on someone's weaknesses. I truly believe that Seattle University is the place that can teach me more about how to become a better person with the necessary amount of skills that can help me to be a successful woman in the future. My graduation from this university will not be the end. It will become a good beginning of my future, my career, and my successful life as a true specialist in the sphere of finance. Hopefully, Seattle University can provide me with such opportunity to become better from different perspectives.
